Centers of Excellence are flagship institutions that provide statewide support to business, industry, labor and the state's educational systems for the purpose of creating a highly skilled and readily available workforce critical to the success of the industries driving the state's economy and support of Washington families. Each Center focuses on a targeted industry that is built upon a reputation for fast, flexible, quality education and training programs. A targeted industry is identified as one that is strategic to the exonomic growth of a region or state.

The Center of Excellence for Homeland Security Emergency Management (HSEM) helps state community and technical colleges (CTC) prepare a skilled workforce to help maintain our national security, ensure an effective response to allhazard events through education and training

initiatives, and build disaster resilience in our communities. Our goal is to provide effective leadership and coordination that rapidly responds to the interests of educational institutions and workforce training needs of the HSEM business and industry sectors across the state. We accomplish this through working with a coalition of all 34 community and technical colleges, public agencies, and private sector organizations. The Center serves as a liaison between business and industry and the CTC system faculty and administration. Public and private organizations and businesses receive technical assistance, expertise, information and research on current regional, state and national security and economic development initiatives and workforce trends.

PATHWAYS OPENER

HE FIELD OF HOMELAND
SECURITY EMERGENCY
MANAGEMENT (HSEM) is broad
and includes many areas of
work responsibilities. These six
career pathways are groups of shared skills
and responsibilities of occupations in this field.
Each pathway addresses a different career
cluster within the program area of Homeland
Security Emergency Management.

PATHWAYS

Criminal Justice:

The Criminal Justice pathway includes the processes and interactions that occur between the police, courts, and correctional services.

Cyber Security:

Those who pursue the Cyber Security pathway will develop and use the skills necessary to detect, document, and counter virtual security threats.

Emergency Medical and Health Services:

The pathway of Emergency Medical and Health Services deals largely with the performance of basic life-saving skills.

Homeland Security Emergency Management:

The pathway of Homeland Security Emergency Management is comprimised of individuals who are ready to respond to emergency situations such as natural disasters or public health threats.

Fire Services:

The Fire Service pathway deals with things like fire protection, fire prevention planning, fire education, and emergency preparedness.

Occupational Safety and Health:

Occupational Safety and Health professionals work to prevent accidents and health hazards to workers, the community, and the environment.

Statement of Clarification & Accuracy: The programs and degrees in this guide are offered by the community and technical colleges in Washington State. Every effort was made to ensure that this guide is complete and accurate. Despite all efforts to have an exact and comprehensive guide, it may contain inaccuracies. These errors should not negatively reflect the included programs, organizations, or individuals.

To report inaccuracies, please contact the Center of Excellence for Homeland Security Emergency Management at: http://www.coehsem.com/contact/

WASHINGTO STATE SKILL CENTERS Skills centers are regional secondary schools that serve high school students from multiple school districts. They provide instruction in current industry preparatory programs that are either too expensive or too specialized for school districts to offer individually. Currently, there are 15 core skill centers campuses throughout the state, and 3 additional branch campuses at other sites. Students may earn high school and college credits and industry certificates for completing the 1 to 2 year programs.

OCCUPATIONAL CAREER CLUSTERS

A detailed list of all of our career clusters and degree options available.

CRIMINAL JUSTICE

INDUSTRY DESCRIPTION:

THE CRIMINAL JUSTICE pathway includes the processes and interactions that occur between the police, courts, and correctional services. Whether it's the police that keep our streets and families safe, the advocates protecting the rights of victims, or the corrections officers that monitor our jails and prisons, public safety is greatly impacted by these professionals. Those who pursue this pathway will become a part of one of those three systems and enforce local, state, and federal laws within their own jurisdiction.

PROGRAM OVERVIEW:

The goal of a program in this pathway is to teach students to analyze and think critically about the practices, policies, procedures, and institutions that make up the field of Criminal Justice. Students will gain a strong understanding of the integral relationship between crime, justice, and society and will study crime prevention, law enforcement, and criminal justice ethics, the psychology of victims, and crisis de-escalation and intervention.

- Understanding criminal law in Washington State.
- Resolving conflict in a variety of situations.
- Analyzing how a case proceeds through the criminal justice system.
- Applying basic methods of police patrol, operations, and management.
- Apply basic investigative techniques for developing solutions to crime problems.
- Secure and process a crime scene, employing proper techniques of evidence gathering, searching, sketching and on-scene interviewing.

CORRECTIONS

INDUSTRY DESCRIPTION:

Graduates who concentrate in Corrections do such things as confine dangerous and aggressive individuals, prepare legal reports, search persons, subdue violent inmates, testify in court, and in some extreme cases, use deadly force. They also identify and understand correctional practices in the United States in relation to philosophies of punishment, sentencing practices, victim's rights, and institutional limitations.

PROGRAM OVERVIEW:

Programs in corrections will provide students with an understaning of the adult and juvenile criminal justice processes, its agencies and personnel. These programs will study the theory, concept and historical significance of the evolution of the criminal justice system.

GRADUATES WILL DEVELOP SKILLS IN:

- Documenting a variety of behaviors and events in a manner that is specific, clear, grammatically correct, culturally sensitive, and legally defensible.
- Applying basic methods of institutional management and rehabilitative practices.
- Applying basic theories for the causes of crime and dynamics of criminal behavior.
- Applying the laws regulating institutional conduct in a fair manner.

CAREER OPPORTUNITIES:

- Uniform jail and prison corrections officers
- Prison Superintendents

FORENSIC PATHWAYS

GRADUATES WILL DEVELOP SKILLS IN:

- Understanding the information that they have acquired to understand the correct approach for a forensic investigation in terms of data recovery, examination, use of instruments, and analysis.
- Identifying crime scene considerations of investigators for a variety of different crime scenes.
- Employing proper and appropriate evidence collection, preservation, documentation and transport techniques of all evidence identified at the crime scene.

INDUSTRY DESCRIPTION:

FORENSICS IS CONCERNED with the recognition, identification, individualization, and evaluation of physical evidence using the methods of the natural sciences. Some of the major areas of this specialty include toxicology, odontology, trace evidence (hair, fibers, glass, etc.), ballistics, and explosives, accelerates, and fingerprint examination. Their research, examinations, and findings are used as evidence in legal cases.

PROGRAM OVERVIEW:

Programs in forensic science combine courses in investigation, evidence, criminal law and procedures, with science and math courses in chemistry, calculus, analytic geometry, and quantitative presentation, court testimony preparation, and some include training in the ne Automatic Fingerprint Identification System (AFIS).

PARALEGAL

INDUSTRY DESCRIPTION:

Through formal education, training and experience, paralegals have knowledge and expertise regarding both the legal system and substantive and procedural laws wich qualify them to do work of a legal nature under the supervision of an attorney. Paralegals work as members of legal teams in law firms, business, government, and social service organizations. They are trained to prepare legal documents, conduct research and investigations, interview clients and witnesses, prepare probate inventories, help attorneys in litigation, and organize and index documents.

PROGRAM OVERVIEW:

A program in this pathway aims to train the student in conducting legal research, developing trial notebooks and supporting trial work, preparing legal documents, summarizing depositions, writing detailed procedures for law office specialty areas, interviewing clients and performing investigative work, understaning procedures that involve decision making, and performing administrative functions.

- Understanding the basic principles of the American legal system, including the sources of law, jurisdiction, civil case procedure (including Local, State and Federal Rules), the structure of state and federal court systems, and the lawyers' role in the legal system.
- Understanding the role and responsibilities of paralegals in various specialized areas of law.
- Learn how to conduct effective factual and legal research.
- Preparing legal correspondence, memoranda, documents, exhibits, and in that content, properly interpret legal citation.
- Developing discovery plans, prepare cases for trial and capably assist in all courtroom proceedings.

CYBER SECURITY

INDUSTRY DESCRIPTION:

Those who pursue the Cyber Security pathway will develop and use the skills necessary to detect, document, and counter virtual security threats. This will be done through the use of various programs, networks and systems to safeguard information and protect the United States' security information system.

PROGRAM OVERVIEW:

A program in this pathway prepares students for careers involving the protection of information on computers against unauthorized access or modification of information. Curriculum content includes basic and advanced computer and networking skills, computer forensics, firewall implementation, intrusion detection system implementation, layed security design and implementation, virtual security processes and procedures, and introduction to security management, planning, and recovery.

- Planning, coordinating and implementing secure networks.
- Administrative and technical strategies for mitigating and managing threats posed to information systems.
- Planning and executing an information security risk analysis and vulnerability assessment.
- Performing effective digital forensics investigations at the device and network levels.
- Understanding how to detect a network intrusion.
- Data protection and network hardening techniques.
- Digital evidence recovery.

EMERGENCY MEDICAL & HEALTH SERVICES

INDUSTRY DESCRIPTION:

The pathway of Emergency Medical and Health Services deals largely with the performance of basic life-saving skills which include: control of bleeding, stabilizing fractures, providing oxygen and other necessities to avoid the development or progression of shock, as well as transportation to the emergency room.

PROGRAM OVERVIEW:

A program in this pathway will provide lectures and hands-on practice and techniques in the areas of emergency care, bleeding and shock, soft tissue injuries, environmental emergencies, lifting and moving patients, cardiac arrest management, and more.

- Applying knowledge of anatomy and physiology to patient assessment and management in order to assure a patent airway, adequate mechanical ventilation, and respiration for patients of all ages.
- Applying scene information and patient assessment findings to guide emergency management.
- Evaluation patients and all emergency treatement procedures short of those rendered by physicians.
- Assessing and recognizing illness or injury related to medical and traumatic causes.
- Providing basic life suppor as well as advanced life support measures to treat illness or injury.

FIRE SERVICES

INDUSTRY DESCRIPTION:

Fire service professionals face a diverse and complex environment. Things like fire protection, fire prevention planning, fire education, emergency preparedness, coordination, resource economics, and many other issues need to be addressed and managed on a daily basis. The duties of the firefighter include extinguishing and controlling fires, performing rescue and evacuation work incidental to fire control, and aiding in response to accidents, natural disasters, and other incidents where human lives are threatened.

PROGRAM OVERVIEW:

A program in the Fire Science pathway will teach a student how to respond to emergencies and save lives, identify, stabilize and mitigate emergency situations, reduce loss of property and improve public safety. Instruction generally includes fire suppression, fire investigation, fire prevention, emergency and rescue systems, emergency response, officer training and coordination with other agencies.

- Developing logical and critical thinking strategies to evaluate/prevent fires, hazards, other emergencies and deploy resources in emergency operations
- Emergency rescue training
- Organizing fire ground operations
- Use the Incident Command System to manage a wide variety of planned and unplanned incidents.
- Demonstrate and appropriately use fire service equipment and procedures in conjunction with a variety of emergency response incidents
- Utilize fire service leadership techniques to regulate personnel management, control discipline, train staff, perform strategic planning, and coordinate emergency or non-emergency activities.
- Utilize the principles and practices involved with planning, preventing and managing terrorist and natural disasters.

HOMELAND SECURITY

EMERGENCY MANAGEMENT

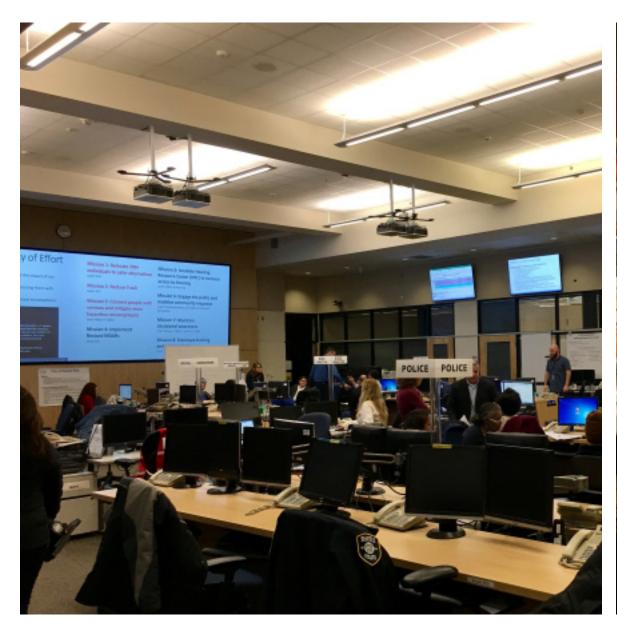

INDUSTRY DESCRIPTION:

The pathway of Homeland Security Emergency Management is comprised of individuals who are ready to respond to a natural disaster, public health threat, wartime, technological disaster, hostage situation or other emergency situation. They do so by coordinating disaster response or crisis management activities, providing disaster preparedness training, and preparing emergency plans and procedures.

PROGRAM OVERVIEW:

Programs are designed to prepare the next generation of emergency management and policy leaders with the knowledge and skills they need to improve outcomes in disasters of all types. The programs incorporate instruction in policy as well as planning and operational components of emergency management and homeland security. The curriculum provides policy foundations and advances students through core competencies in hazard identification as well as teaches them fundamentals in regards to risk and vulnerability assessment, terrorism, mitigation, preparedness, response and recovery, and planning for diverse populations.

- Understanding and analyzing the different phases in Emergency Management: Prevention, Mitigation, Preparedness, Response, and Recovery.
- Knowing how to integrate, coordinate, and collaborate with communities, agencies, and emergency management teams in order to facilitate crisis prevention, emergency management, continuity of operations, and problem solving.
- Providing expertise on critical guidelines, regulations, and systems utilized in the different phases of emergency management.
- Developing policies, procedures and protocols to allow seamless agency integration from prevention to incident response scenarios.
- Applying a solid foundation of knowledge and skills to assume leadership roles in emergency management, homeland security, and/or public policy.

- Hazard Mitigation Officer
- Emergency Management/Preparedness Director
- Homeland Security Coordinator

OCCUPATIONAL SAFETY & HEALTH

INDUSTRY DESCRIPTION:

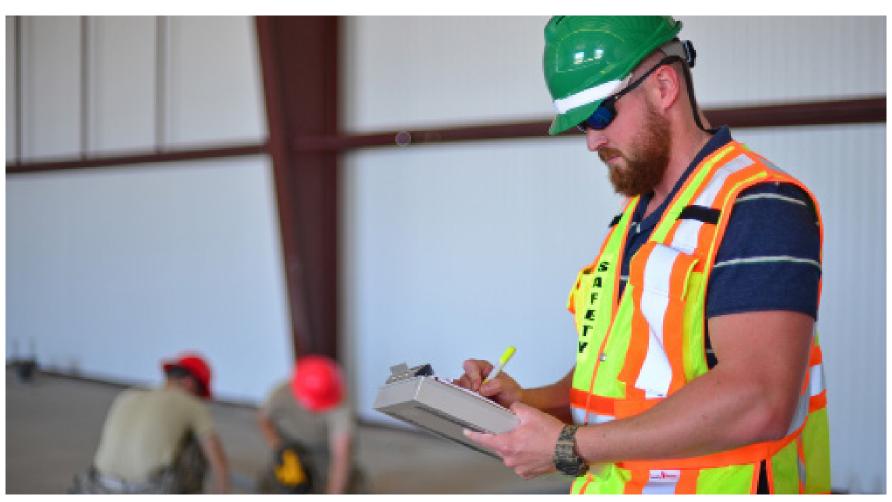

Occupational Safety and Health professionals work to prevent accidents and health hazards to workers, the community, and the environment. They are responsible for the compliance with state and federal regulations regarding workplace safety. They collect data on safety and health conditions, monitor and measure hazards, and make recommendations that help prevent harm to workers, property, the environment, and the general public. They also respond to emergency preparedness and homeland security issues.

PROGRAM OVERVIEW:

A program in this pathway provides education and training for a career in the safety field and prepares students to become experts on national and state workplace safety and health standards. Core curriculum includes courses in safety and accident prevention, safety management, regulatory environment, worker's compensation and risk management, incident investigation, industrial security, and the handling of hazardous materials.

GRADUATES WILL DEVELOP SKILLS IN:

- Identification of risks and hazards in a variety of occupational settings.
- Understanding the history and evolution of terrorism including specific hazardous threats: chemical, biological, radiological, nuclear and explosive/energetic (CBRNE).
- Developing and implementing site-specific health and safety plans that include emergency response
- Develop emergency response plans that can be used to prevent and/or mitigate incidents and accidents, assist organizational members after such incidents, and promote corrective action to prevent similar incidents in the future.

UNMANNED & AUTONOMOUS SYSTEMS

INDUSTRY DESCRIPTION:

The Unmanned and Autonomous Systems pathway includes the process and interactions without or with close interactions with people. Due to the growing use of UAS and sensor technology in such areas as agriculture, law enforcement, firefighting, search and rescue operations, wildlife, forestry, and supply chain security, there is great demand for UAS related degrees and certifications. The field of autonomous machines and service robotics is expanding daily as the Internet of Things apps grow.

PROGRAM OVERVIEW:

A program in this pathway will provide lectures and hands-on practice and techniques in the area of machine operations, basic programming applied to interfacing of machine with people, and security of operations. Emergency management and security of robotics in business require understanding of safety and government regulations for operations in legal and ethical applications.

TAKE A LOOK AT OUR WHAT'S AVAILABLE FOR VETERANS

Management is committed to engaging the skills, talents and experience of our nation's veterans. This is being done through efforts to increase veteran employment opportunities, expand contracting opportunities for veteran-owned businesses, and enhance veteran engagement. The following are some of the resources available to veterans:

- The Veterans' Employment and Training Service (VETS) is a web-based toolkit that is designed to assist veterans in their transition to civilian life and finding employment, as well as to assist and educate employers who have included these men and women in their recruitment and hiring initiatives. http://www.dol.gov/vets/
- Tacoma-Pierce Co. Veteran & Business Service facilitates veteran employment across the business community, promotes the value proposition (veterans are a key business resource opportunity), and enable the military-to-civilian life transition to yield successful employment outcomes. http://www.tacomachamber.org/content/veteran-and-business-service
- Using the post 9/11 GI Bill, you can get up to 36 months of financial support for education and training for graduate and undergraduate degrees, vocational/technical training, correspondence training, licensing and national testing programs, and tutorial assistance to prepare you for a career in cyber security. http://www.benefits.va.gov/gibill/
- The Veterans Retraining Assistance Program (VRAP) offers 12 months of training assistance for unemployed Veterans. You may qualify for up to 12 months of assistance at the full-time payment rate under the Montgomery GI Bill-Active Duty program. http://ben-efits.va.gov/VOW/education.asp

- SCORE is committed to helping veterans, service members and their families looking to start and grow small businesses with significant, long term success. https://www.score.org/topics/veteran_guards_reservists
- A portion of the Washington Procurement Technical Assistance Center is devoted solely to helping veteran owned businesses succeed at the federal or state level. http://washingtonptac.org/veteran-owned-businesses/

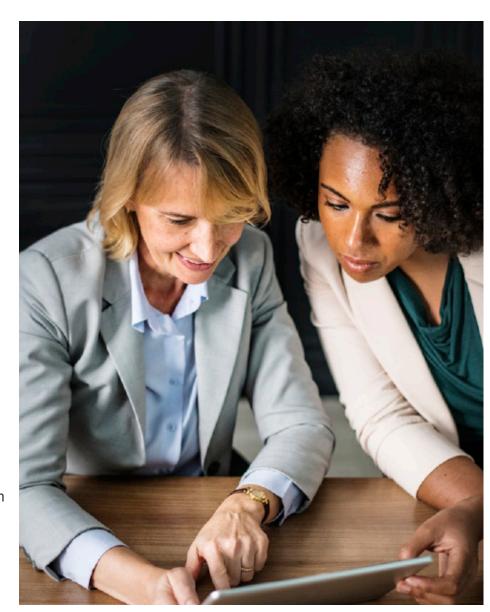

RESOURCES ARE ALSO AVAILABLE FOR WOMEN

Diversity encourages a culture where opinions can be brought together to develop solutions to solve the problems our nation faces today. Men and women approach these problems differently, respond differently to stress, and work differently with colleagues. Emracing both male and female approaches to problems is a key factor for organizational success. Women are underrepresented in the pathways associated with the Homeland Security Emergency Management career field, but there are many resources available to aid in changing this.

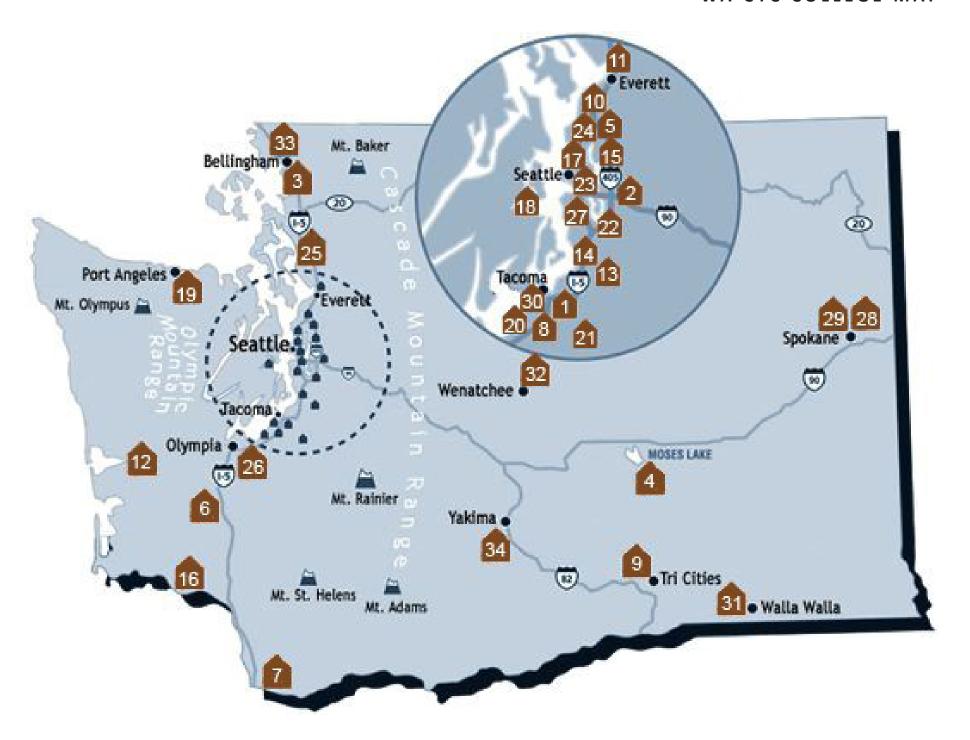

- The Anita Borg Institute This is a non-profit organization whose primary aim is to recruit, retain, and advance women in technology
- National Institute for Women in Trades, Technology & Science (IWITTS) IWITTS helps educators nationwide to close the gender gap for women and girls in male-dominated careers such as technology, trades and law enforcement. IWITTS also works with emploers to assist them in integrating women successfully into their male-dominated workplace. In particular, IWITTS has worked extensively with law enforcement agencies.
- National Center for Women & Information Technology This non-profit community comprises more than 450 prominent corporations, academic institutions, government agencies, and non-profits working to increase women participation in technology and computing.

 NCWIT helps organizations recruit, retain, and advance women from K-12 and higher education through industry and entrepreneurial careers by providing community, evidence, and action.
- WiCyS The Women iin Cybersecurity (WiCyS) community raises awareness about the importance and nature of a cybersecurity career. WiCyS hopes to generate interest among students to consider cybersecurity as a viable and promising career option.
- WSC Women's Society of Cyberjutsu (WSC) is a non-profit passionate organization about helping and empowering women to succeed in the Cybersecurity field.
- The Emergency Management Professional Organization for Women's Enrichment (EMPOWER) is a non-profit that started in 2005 to "help women advance their careers through networking, mentoring, and promoting educational opportunities in the field of emergency management." For more information, visit: www.empower-women.com

- The International Network of Women in Emergency Management: According to the organization's website (http://inwem. org), it's "comprised of a network of international men and women leaders with a passion to create global emergency management systems, and partnerships which promote safer, resilient, sustainable, and prepared, diverse communities and elevate the status of women."
- Women in Homeland Security (WHS) is a non-profit that was founded in 2009 and has more than 800 public and private sector members. "WHS fosters a collaborative environment for homeland security and intelligence on critical homeland security topics confronting the nation." - www.womeninhomelandsecurity.com
- OMWBE (Washington State Office of Minority & Women's Business Enterprises) works to optimize and ensure equity and opportunity for small businesses owned by minorities, women, and the disadvantaged through education, certification, and outreach. For more information, visit: http://omwbe.wa.gov
- WWIN (Washington Women in Need) provides health and education grants to low-income women in Washington to help them improve their lives. Visit their website at: http://wwin.org/
